WHITEPAPER

www.cloudprotocol.io

CLOUD PROTOCOL GROUP

The cloud has been removed by 2021, Big Four professionals and for security reasons.
It is a full-fledged cybersecurity ecosystem against market hackers. this until 2021
Developing a sustainable business development:
Security deployment for the blockchain and crypto industry
Provides high quality against major risks for the B2B space

How is it designed?

Digital cryptoland.
Creates B2C products for individual comprehensive legal protection.
Ethics on the education path resides in the burden of a Cloud and relationship
Blockchain security units will be the leader, but also the biggest cryptocurrency way

VISION AND MISSION

Next to the Cloud is to protect the time and its applications from legal and enforcement and I will say it threats. We do not aim to build a solid foundation for full-fledged products, develop and ground new and existing products. Collectively praise and support C for you and as our local utility token. In our first year, they are our complementary and complementary elements in a sustainable business organization. New products, services and network relations. In 10 years, we plan to continue to plan our future from 2021-2031. It will be backed by our CPRO coin and used in rules use and purchases. This local utility coin will also serve as a special payment option for our upcoming payments. Cloud Firm; A marketplace located where children are legal and free movement can list and sell.

The vision of our local CPRO

CPRO COIN HISTORY

CLOUD PROTOCOL's CPRO

Icon is a global economy icon for all economic uses.

CLOUD Ecosystem

CPRO COIN can be used for life attendees, CLOUD Club membership purchase, even corporate purchase and crypto, Legal security enclosure in the Cloud Ecosystem.

www.cloudprotocol.io

MANAGEMENT

Management needs to be critical for a decentralized project and a strong early age.
Sound governance is the foundation. We believe that Cpro expects the most advanced and the bigger in this regard. Using a progressive decentralized governance.

The Cloud Protocol team
You can delegate the controls of a number of jobs to make users even more powerful and powerful.
Present and make communities more active.

The first part of project development is the clear and well-coordinated work of a team. The product needs thoughtful leadership to test and update acceptances and research. They are fast at the moment, achieve the goal of achieving – its full purpose and promotional,

Small population base, small community, small market etc.
We are ready for a "control transfer device" from the project investor to the project system.
We decided to prepare this process with a Community Pack. This fund
based on cloud development performance over the next six months and their CLOUD will decide how these funds will be managed.

It will be included in your cloud and will contribute to your city.

The information provided in this document,investment advice, financial advice, trading advice or any otherone kind of advice and you shouldn't treat any of the website.such is the content. Do your own due diligence and consultConsult your financial advisor before making any investment decisions.

CLOUD PROTOCOL MARKET ANALYSIS
THE EMERGING DIGITAL MARKET PLACE

Despite the devastating effects of Covid-19 on traditional businessesrestaurants and cafes, real-life retailers and major events, and conferences based on face-to-face interactions, pandemic boon in disguise for digital service providers.
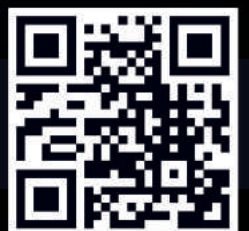

United Nations Conference
Trade and Development, e-commerce share of global retail trade it rose from 14% in 2019 to about 17% in 2020.
In many countries, e-commerce transactions are shifting from luxury goods and services for daily needs.
Not surprisingly, the rise of digital services has led to rapid adoption of digital services. As businesses migrate to provide online services, they can no longer rely.

We have established a digital payment infrastructure to process and completely based on cash transactions. To create a more reliable infrastructure of this infrastructure, to provide companies and individuals and institutions with reliability certificate and license opportunities for funding tools.

www.cloudprotocol.io

CONSUMER PAYMENTS

At the same time, consumers are actively digital payment services despite initial concerns about security and privacy. Businesses and consumers now see the vital benefits of digital payments such as contactless payment transactions and the ability to pay from anywhere. Serves as a critical way to reduce. Physical interactions at the point of sale and physical interaction with shared devices. More importantly, this trend is not a trend, especially for contactless transactions. BROTHER Research, a global technology market advisory firm, is saying that contactless technology will eventually. It is becoming the de facto type of digital payment of the future. According to McKinsey's 2021 payment market, report on relevant in-store transaction volume.

Contactless payment via physical card and mobile wallet has increased significantly since then the onset of Covid-19 and it will continue to progress. To support the infrastructure with crypto accounting programs that will be formed together with the constitutional law principles of existing governments and to take the necessary steps together with the community.

The Potential of Mobile Wallet The wide availability of contactless credit cards kickstarted the initial wave of contactless payment. The popularity of contactless credit cards continues to grow in countries with mature digital payment systems, as consumers typically stick to the payment methods that they are familiar with due to security concerns and ease of use. However, the scenario is very different in developing markets with less mature digital payment infrastructure. As a result, alternative forms of digital
payment play a critical role, particularly mobile wallets.

China is a prime example as Alipay and WeChat Pay are the two top global leaders in mobile wallet technologies. In developed markets, tech giants such as Apple, Google, and Samsung are playing catch-up after sensing the enormous market potential of mobile wallet technologies. They are actively acquiring merchants and expanding their user base to compete with the top Chinese vendors.

Basically, three main trends have triggered the popularity of mobile wallets:
Mass adoption of smartphones in the global population as people navigate with their smartphones, mobile wallets. Frees people from carrying the need for a physical wallet on a smartphone and significantly reduces payment friction. More than 80% of the world in 2021
The population will have at least one smartphone in their pocket Deloitte. The percentage is much higher in developing countries. The smartphone is the primary means of Internet access for many.

Tight integration with a wide range of services

Compared to debit and credit cards offered by financial institutions, technology vendors that engage in the platform economy provide mobile Market Analysis wallet services. These vendors, such as WeChat, Alipay, GrabPay, and Line, develop their multipurpose app that serves as a single portal to a wide range of virtual products and services. The diversity of services offered by these companies have become an industry norm, resulting in other specialised mobile wallet vendors expanding their in-app services through partnerships and collaborations.

CLOUDPAY (PAYMENT)

CPROPay (CPROPay) is a decentralized EIP-2718 payable, built on the trusted Ethereum network. It is built for crypto systems involving private trading. CLOUDPay will create a universal payment platform that offers cities around the world and their users to request and do business with it cheaper.

FUTURE CLOUDPAY

By reducing transaction costs, CloudPay can be made more affordable and accessible worldwide, available for purchase on Ethereum. We plan to do this with the EIP-2718 contract and our own custom prophecies to keep job fees low and fast. Using this technology, think of our own thinking about a very small system.

REALITY CLOUDPAY

CloudPay Protocol. With this protocol, you can make a crypto billing system service, payment network fee and mass sale with token payment.

TRADERS / BUSINESS

Willingness to capitalize on the booming cryptocurrency industry Merchants, businesses, whether offline or online, eagerly seek technology or platforms that allow them to start accepting crypto currency.
Payment integration solution for existing Enterprise Resource Planning (ERP)
Accepting cryptocurrency payment is not just about payment possibilities.
Established businesses are looking for a system that can be.
It is easily integrated into their company's ERP to streamline their tax returns and accounting.

MARKET ANALYSIS

Protection against credit card chargebacks. Unfortunately, traders do not have enough protection. Coming to tackle chargebacks. Even if a merchant does not have a 'refund' policy, a credit card chargeback policy allows consumers to still file chargebacks.

As a result, traders are always on the losing side.When it comes to credit card fraud. If a business has too many chargebacks, accounts as a percentage of their total transactions may be closed or costs per transaction may increase significantly

EIP-2718 Protocol: ERC-1363 Coin Payable

After a BEP-20 transfer or approval (i.e. apayment), you need to send another transaction and pay GAS to be able to trade.

The EIP-2718 protocol was proposed and created to address this shortcoming. We have included EIP-2718 in the CPROPay ecosystem to make token payments
It's easier and works without using any other listeners.

Allows to create a callbackafter a transfer or approval in a single transaction.
Many suggested uses can accept BEP-20 payments.

Examples could be: To create a crowd sale payable with tokens Sales services for tokens
Paying bills
Don't subscribe
For these reasons, it was named "Payable Token".

CLOUDPAY ECOSISTEM

Purpose, underlying protocol and cryptocurrency CloudPAY is the future of decentralized, scalable cryptocurrency payment. Merchant transactions. CloudPay includes the ERC-1363 protocol to enable users Paying for daily expenses using CloudPAY Coin and other ERC tokens built on it Ethereum network (ERC).

On top of that, users are rewarded with CloudPAY coins.
They spend ERC coins.The base currency used for all transactions on the CloudPAY platform, $CloudPAY.
Investors can buy this cryptocurrency through UniSwap. Inside in the future, investors will be able to purchase $CPRO on other cryptocurrency exchanges.
Unlike other cryptocurrencies, $CPRO cannot be mined and its total supply is limited (4 billion)

PRODUCT- DAPPS: CloudPay Decentralized Apps Payment Processing DApp
– This DApp allows payment and funds transfer to take place almost instantaneously.
– DApp decides vendor payment currency (CPRO, BUSD /USDT/ other tokens) according to trader preferences.
– We hope to make more use of DApp to support daily transfers, cross-border transfers and payment transfers.
Merchant Dapp: – This DApp is used to store the merchant information, status, and merchant fees if applicable.
– It will also store the ongoing promotion or rewards with any participating token and define the discount and perks.

Ledger DApp
– Ledger DApp will be used to store all the payment information.
– DApp will store items purchased, item details, quantity, price, and discounts.
– Data can be exported through the CloudPay Merchant platform.
Trezor DApp Trezor DApp will be used to store all the payment information.
– DApp will store items purchased, item details, quantity, price, and discounts.
– Data can be exported through the CloudPay Merchant platform.
PRODUCT- Websites: Cloudpay Platform
Merchant Portal
– This merchant portal allows the merchant to sign-up and start accepting cryptocurrency in e-commerce.
– Merchants can manage API's with the integration module to integrate reports and accounting reports to their existing ERP. – It will be a one-stop place to manage offers, discounts, and print reports.

CLOUDPAY WEB WALLET

-This is a stripped-down version of the full CloudPay Wallet in the web browser.
– Users can make payments easily to any e-commerce website in just a few clicks.Product – Mobile Apps: CloudPay Wallet CloudPay Wallet (iOS + Android)
– This main CloudPay product allows users to create wallets easily, get CPROPAY and make payments using CPRO.
-Users can stake CPRO to earn interest through the wallet app. – Users can track their cryptocurrency expenses easily and can export data for tax filing purposes. – Wallet enables users to scan QR to make the payment instantly at café, restaurants, shops, and e-commerce websites

CLOUDPAY POS (Payment Terminal / POS Terminal)

– CLOUDPay POS Terminal is a standalone payment terminal for cafes, restaurants, retailers and businesses on the go.
– CPROPay POS Terminal will be a plug-and-play device that supports any modern POS system. – Merchants can start accepting crypto payment by purchasing the CloudPay standalone POS terminal. CPROPAY System Architecture The core of CLOUDPay heavily relies on platform development.
Four primary considerations in choosing our tools and platforms have been identified.
They are Security, Scalability, Ease, and Extensibility; these have been amalgamated into our core values:
Security – Protect against cyber-attacks. Scalability – Accommodate high user traffic.
Extensibility – Allow the addition of modules in the future Ease – Ensure least development effort.

CLOUDPAY PAYPAL(OTHERS) BANKS

Fees : Low, Fixed (US$0.05 -US$0.30) Typical MDR above 3% per transaction depends on the volume Typical MDR above 1.5% per transaction depends on the volume
Processing Speed :Near-instant (Average between 1-5s)
Security : Secured, immutable, tamper-proof
PCI DSS Level 1
Identity Protection : Pseudonyms, shield identity and protect personal privacy Identity is linked, identifiable, and monitorable Identity is linked, identifiable, and monitorable
Interest Earning - Yes, stake to earn high interest - No interest -Less than 1%

CLOUD PROTOCOL ROADMAP

Q4 2021

STEP 1

CLOUD PROTOCOL (CPRO) COIN LAUNCH
THE CRYPTO MARKET'S SECURITY BELT

STEP 2

OPENING OF SOCIAL MEDIA ACCOUNTS
(TWITTER,TELEGRAM,REDDIT,DISCORD,REDDIT)
FOR CPRO

STEP 3

WEBSITE LAUNCH
*01.10.2021 WE HAVE SUCCESSFULLY LAUNCHED OUR
WEB PLATFORM AS A BETA VERSION*

STEP 4

COINLIST
STARTING ICOSALE ON COINLIST.

STEP 5

LISTING ON LA TOKEN, MEXC AND COINTIGER

STEP 6

LEGAL R&D RESEARCH
*AN INVESTIGATION WILL BE CONDUCTED WITH LAWYERS TO
INVESTIGATE THE TEXT OF THE INTERNATIONAL PERSONAL
DISCLOSURE AND IN TERMS OF THE LAW.*

STEP 7

CLOUD PROTOCOL LEGAL ARCHIVE STORE
*TO PREPARE AN ARCHIVE CONTAINING INFORMATION AND
PRECEDENT CASES RELATED TO THE LAWS OF THE
PERSONAL DISCLOSURE TEXT OF ALL COUNTRIES, ACTS OF
FRAUD AND PRECEDENT CASES*

STEP 8

JOIN CRYPTO TRAVELERS
*AFTER THE LISTING OF COINMARKETCAP AND COINGECKO AS
CPRO COINS, THE PROJECT OWNERS NEED TO CONFIRM THEIR
CERTIFICATES WITH KYC(BASED ON THEIR PERSONAL DATA)
AND AGREE TO GET COINMARKETCAP APPROVAL*

STEP 9

**CLOUD PROTOCOL INTRODUCTION IN PIN
MESSAGES OF CHANNELS**
*WRITE YOUR ARTICLE ON COINTELGRAF AND FIND OUT
YOUR GOAL FOR STRATEGIC PARTNERSHIPS.*

STEP 10

WHEN CEX ?
AN IMMEDIATE STOCK MARKET LISTING.
A LISTING PARTNERSHIP AGREEMENT WITH PLATFORMS SUCH
AS LA TOKEN, COINTIGER, MEXC
-START TRADING CPRO ON STOCK EXCHANGES WITH LOW
TRADING COMMISSION TOGETHER WITH INVESTORS TO HAVE
CPRO IN EVERY WALLET-
PAMPER THEM
IMMERSIVE TRADING COMPETITIONS
AWARD WINNING AMA EVENTS
MAKE AIRDROP CONTESTS THAT WILL MAKE YOU MISS SLEEP
AND START THE PARTY

STEP 11

**PARTNERSHIP WITH LEGAL PLATFORMS ALL
OVER THE WORLD**
FIND ANSWERS TO THE QUESTIONS OF WHO IS WHERE,
WHEN, HOW, WHY AND IN WHAT WAY
MEET WITH INTERNATIONAL JUDICIAL UNITS TO SHED
LIGHT ON PRECEDENT DECISIONS, CASES.

STEP 12

PROJECT INITIATIVES
AMA MEETING WITH INVESTORS TO LISTEN EVERYONE.

STEP 13

YOUR FIRST GOAL IS TO ISSUE AN AUDIT
CERTIFICATE TO 500 PROJECTS
MAKE PEOPLE INVESTMENTS SAFER.

www.cloudprotocol.io

CLOUD PROTOCOL ROADMAP

Q1 2022

STEP 1

THE MADNESS OF THE POS SYSTEM
JOIN THE CRYPTO POS DEVICES CRAZE IN MORE THAN 100+ COUNTRIES AND SHOP WITH CPRO. BUY YOUR COFFE WITH YOUR CPRO.

STEP 2

EUROPEAN TOUR
EXPAND YOUR TEAM TO EUROPE, SET UP MINI-OFFICES IN VARIOUS PARTS OF THE WORLD AND START AN ECO-SYSTEM IN A LEGAL SENSE

STEP 3

DEAL WITH TIER 1 STOCK EXCHANGES
COINBASE, BINANCE AND GATE.IO DEAL WITH THEIR PLATFORMS
CPRO STORM ALL OVER THE WORLD

STEP 4

ROAD MAP OF THE ENDLESS MAZE
YOU SHOULD CALL THE ITERATIVE COMMUNITY TO THE POLLS FOR NEW ADDITIONS THAT CAN BE DEADLOCKED ON THE PROJECT'S ROADMAP.

STEP 5

DECONFLICTION BETWEEN CONTINENTS
COMBINE ETHEREUM (ERC20) AND BINANCE SMART CHAIN (BEP20) NETWORKS WITH A BRIDGE
A WELCOME PARTY WITH BINANCE SMART CHAIN INVESTORS (DISCORD)

STEP 6

A BUSINESS PARTNERSHIP ?
GO IN PARTNERSHIP WITH EXCHANGES WITH AN APPLICATION SYSTEM.
BINANCE ? SHAKE HANDS WITH CZ AND SHOUT TO THE WORLD WITH HIM.
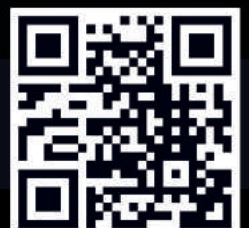

STEP 7

VENDOR INTEGRATION FOR PAYMENT TRANSACTIONS
AN EXAMPLE AND POSSIBILITY OF ACCEPTING CPROPAY PERSONALLY AT THE POINT OF SALE FOR SELLER INTEGRATION FOR TRANSACTION AND TRANSACTION RECIPES IN POS SYSTEMS

STEP 8

YOUR SECOND GOAL IS TO ISSUE AN AUDIT CERTIFICATE TO 1500 PROJECTS

CLOUD PROTOCOL
